63 - 79 DRIVELINE and DIFFERENTIALS

In road racing, you get a lot of practice building rear ends. In thirty years of racing with these differentials, we had only one failure. We sheared the ring gear bolts smooth off at the Detroit Grand Prix. We fed almost 700 HP through stock stub axles and spindles, and they never broke. This is one great piece of equipment.

63-79 Differentials

Our remanufactured differentials are sold with no core charge. We will ship freight free within the Continental US in a reusable heavy-duty box. You can use the box to send in your old differential, or you can keep it.

If the exterior of your differential appears OK, and there are no apparent defects, its total core value would fall between \$100 and \$400. See the core value menu for details. The freight back on your old unit is your responsibility.

All our differentials come with **new ring and pinions, as well as new GM stub axles, and a GM cover**, Timken bearings, seals, and an Eaton clutch pack. They are shipped complete with fill plug, and are guaranteed to perform perfectly under normal conditions and use for three years. **Note: UPS won't let us fill them with oil, so they are shipped with NO OIL.**

** If you want to save a few bucks, we may have the used gearset you want in stock. If we have it, we can supply any three series differential equipped just like our standard units, but with a used ring and pinion, stock rear cover and stub axles for **\$1499**. We will not reuse a gearset with more than 1/2 of the pattern showing wear. Check stock for used gearsets.*

Remember, No Core Charge, and No Freight

Note: PLEASE SPECIFY MODEL YEAR, PINION FLANGE SIZE AND THREADED OR U-BOLT STUB AXLES IN THE SPECIAL NOTES BOX AT CHECK-OUT!
