

The main dashboard instrument cluster is a black plastic panel with a chrome trim. At the top, there are two rectangular air vents. Below the vents are five circular gauges. The top row contains a speedometer (scale 0-260) and a fuel gauge (scale E-F, labeled 'UNLEADED FUEL ONLY'). The bottom row contains an oil temperature gauge (scale 100-320, labeled 'OIL TEMP'), a tachometer (scale 0-80), and a battery charge gauge (scale 0-8). Below the gauges is a Kenwood KRC-3000 stereo unit with a cassette slot and various control buttons. The stereo is flanked by two circular knobs for volume and balance. The text 'KENWOOD' and 'HIGH POWER STEREO CASSETTE RECEIVER' are visible on the stereo face.

The climate control panel is located below the stereo. It features a gear shift knob on the left. The panel includes a fan speed control knob with 'HI' and 'LO' settings. To the right are buttons for 'A/C', 'MAX', 'NORM', and 'ECONOMY'. Below these are buttons for 'VENT', 'HTR', and 'DEF'. A temperature slider is positioned at the bottom, ranging from 'COLD' (blue) to 'HOT' (red).
