E-FORCE SUPERCHARGER SYSTEM

AVAILABLE FOR POPULAR FORD & CHEVROLET APPLICATIONS

These Edelbrock E-Force Supercharger Kits provide **instant, reliable and safe horsepower with low boost for minimum stress** on the engine. The core of each system is the Eaton Gen VI 2300 TVS® Supercharger rotating assembly. Eaton's assembly features a four lobe design with 160° of twist for maximum flow, minimum temperature rise and quiet operation for excellent drivability. The supercharger assembly has been integrated into the intake manifold for a seamless design with minimal components, eliminating the possibility of vacuum leaks between gasket surfaces. Edelbrock's inverted supercharger assembly is uniquely oriented, allowing for an **incredible amount of intake runner length for maximizing low end torque**. An integrated bypass valve helps eliminate parasitic loss under light throttle for improved mileage potential.

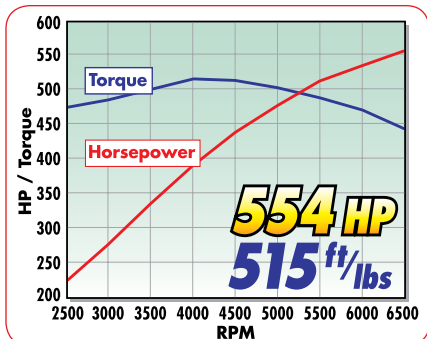

Mustang systems breathe through a **specially engineered 85mm electronic throttle body and GM systems utilize the factory 90mm throttle body, matched with the most unique and efficient inlet configuration on the market**. This combination results in a shorter, less restrictive intake path for improved air flow, without the need for a jack-shaft. Keeping the air cool is a high capacity air to water intercooler and low temp heat exchanger.

Finally... the Edelbrock E-Force Supercharger system is not just a performance upgrade, it also has great looks! The supercharger assembly and matching aluminum coil covers are black powdered coated for durability with highlighted fins and Edelbrock logo for a **unique appearance that will give any engine compartment a custom look**.

- Bolt-on installation – no cutting or modification needed and fits under the stock hood and cowl
- Features Eaton® TVS Rotor assembly; the same high-quality rotors used by GM on the Corvette ZR1
- 50-state emissions street legal - E.O. numbers pending
- Available with an optional supplemental warranty - See specific listing for details
- Self contained oil system with 100,000 mile service interval (no drilling or plumbing required)
- Electronic PCM programming module, with application specific tuning
- High Flow Mass Air Flow Sensor (MAFS) on some applications
- Integrated bypass valve for little to no decrease in fuel economy

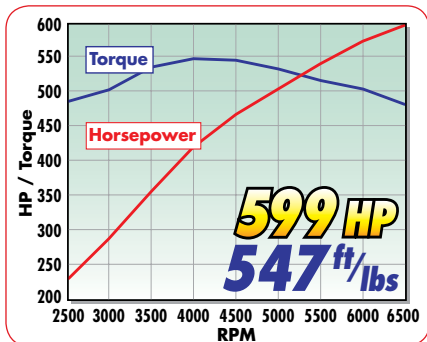

COMING SOON...

E-FORCE SUPERCHARGER FOR THE CHRYSLER HEMI!

E-Force Supercharger Kit #1590 for 2008-09 Corvette

**COMING SOON...
COMPLETE SUPERCHARGER KIT
FOR 2005-07 C6 CORVETTE**

E-Force Supercharger Kit #1591 for 2008-09 Corvette

2008-09 CORVETTE

Now you can boost the power in your 2008-09 LS3 Corvette to near ZR1 performance! These new E-Force Supercharger Systems are exclusively tailored to boost your performance to 554 flywheel horsepower and 515 ft./lbs. of torque (with stock fuel pump) or 599 flywheel horsepower and 547 ft./lbs. of torque (includes high volume fuel pump). The unique features on these kits are the 12" long intake runners that allow for maximum low end torque and the optional 5 year 100,000 mile supplemental warranty. Plus, this kit fits under the stock hood with no modifications. Not compatible with Z06 or ZR1 models.

- 554 HP Complete Supercharger Kit for 2008-09 Corvette#1590^
- 599 HP Complete Supercharger Kit for 2008-09 Corvette#1591^

CORVETTE UPGRADE KIT

This kit contains the items necessary to upgrade the #1590 (550 HP) kit to 599 HP, including: fuel pump module, 3.5" pulley and proper calibration.
