

**2017 Callaway Corvette Stingray Grand Sport  
Admiral Blue/Jet Black  
2LT Z07 + Callaway SC627 Package  
6.2L/376 cu. in. supercharged V8  
627 HP, 610 lb.-ft. Torque  
7-Speed Manual Transmission  
0-60 mph: 3.4 sec., ¼ mile: 11.0 sec. @ 126 mph, Top Speed: 178 mph  
6,245 miles (~800 on track)  
VIN: 1G1YX2D73H5108525**

Here is a fully loaded and thoroughly sorted “trackable street car” or “streetable track car”. Whether you want the “bragging rights” or a serious track days contender, this is the real deal. Starting with a highly-optioned Grand Sport model, this C7 has been treated to the complete Callaway SC627 package (~\$20k), then upgraded further with new/improved Mahle pistons, Calles connecting rods, bearings, and the Callaway shifter package - all done by Callaway in Old Lyme, CT in 2018. The Callaway standard equipment includes their GenThree™ Supercharger with TripleCooled™ intercooler system, high flow intake system, embroidered Callaway logo floor mats and door sills, exterior and interior badging, Callaway underhood plaque with Vehicle Identification Number, Callaway key fobs, Callaway Corvette authenticity documentation package and Callaway Warranty (good until 1/2020 or 36,000 miles. Its Platinum GM warranty (zero deductible) is good until 11/18/2023 or 56,510 miles.

Installed extras include ARP wheel studs, a Brey-Kraus harness bar, a higher-capacity Dewitts radiator, Katech Oil cooler kit, Haltech intake, composite side skirts. The brand new & never used original OEM ceramic composite brakes & pads, heated & cooled seats, and front splitter are now installed, as are the Z07 package OEM wheels with Michelin Sport Cup II tires. It also has Xpel protective film, with most of the car covered, double in many areas – so it is still pristine. A flannel car cover is included, as is a clean Carfax. All told, this Corvette has ~\$29k of extras included.

Available are an extra set of Michelin Super Sport tires with <200 miles, as well as other items that can be discussed, e.g., a DSC Sport shock controller with more settings, two sets of forged wheels, Giro steel replacement rotors (2 sets, 1 with 80% remaining, the other 50%), street and race brake pads, and Cosworth Tool Box software for additional data recording (see the photos). Also available is secure, heated and accessible winter storage.
