# FLEMINGTON CHEVROLET BUICK GMC CADI LLAC

---

Our dealership's primary goal is to satisfy every customer at every opportunity where reasonable and practical to do so. You visit our service department regularly, and we have developed a number of ways to make your visit more comfortable and informative. We know you want straight answers, and that's the only way we deliver it to you. In order to be sure that our technician's findings and reporting are as clear and concise as possible, we use the Vehicle Information Booklet as a tool to help us communicate what we found as to your vehicle's condition, based on what you have told us. Our technicians are qualified to work on your vehicle. They have been trained, and partake in continuing education to be sure they are updated on improvements handed down from the manufacturer. Our service advisors strive to make your experience with us a pleasant one. They are here to attend to your automotive needs as well as communicate effectively between your technician and you. Addressing any identified issues listed by this report, should improve the safety and performance of your vehicle. However, please remember that the inspection is limited to the items listed on the report and consists of a visual inspection of these items, without disassembling or test driving the vehicle. Therefore it is not possible for the technician to see or identify all potential defects, especially those that are internal to the engine, transmission, driveline, electrical systems, or other components. The cleanliness of the vehicle both inside and out at the time of the inspection, may reduce the accuracy of the inspection. Your vehicle may have conditions that are not evident at the time of the inspection or otherwise not presented or noticed during the inspection process. Therefore, the inspection and condition report does not provide any guarantee or warranty that the vehicle will not break down in the future, or have conditions that were undetected during the inspection or were omitted from the report. Also if you choose not to follow recommendations even before issues become critical, that is your own judgment for which we cannot be responsible. We appreciate your business and will continue to strive for excellence in everything we do for you.
