MUST CONFORM TO FEDERAL REQUIREMENTS IN ADDITION TO THESE GRADES

The treadwear grade is a prediction of the relative wear rate of the tire when used on a standard test vehicle under standard test conditions. It is based on laboratory tests of the treadwear of the tire on a standard test vehicle under standard test conditions. It is not a guarantee of the actual wear rate of the tire in actual use. The treadwear grade is based on the treadwear of the tire on a standard test vehicle under standard test conditions. It is not a guarantee of the actual wear rate of the tire in actual use.

TEMPERATURE

The temperature grade is a prediction of the relative performance of the tire when used on a standard test vehicle under standard test conditions. It is based on laboratory tests of the performance of the tire on a standard test vehicle under standard test conditions. It is not a guarantee of the actual performance of the tire in actual use. The temperature grade is based on the performance of the tire on a standard test vehicle under standard test conditions. It is not a guarantee of the actual performance of the tire in actual use.

PASSENGER TIRE MOUNTING SAFETY WARNING

1. NEVER mount tires on rims which are damaged or not approved for use.
2. ALWAYS use the correct tire size and load capacity for the vehicle.
3. ALWAYS use the correct inflation pressure for the tire.
4. ALWAYS use the correct mounting procedure for the tire.
5. NEVER use a clamp-on chuck and ballstem gauge on air hose when inflating a tire.
6. NEVER use a clamp-on chuck and ballstem gauge on air hose when inflating a tire.

WARNING: FAILURE TO FOLLOW MOUNTING AND SAFETY PROCEDURES AND SAFETY PRECAUTIONS MAY RESULT IN PERSONAL INJURY.
